

**NEW**

**ND7053 Wireless Data Transfer**

for the Weighing Industry from Norsk Display

Narrow band radio tranceiver for license free wireless transport of serial data. Transmits up to 2km.

The ideal price competitive solution where cables are expensive or difficult to install.

Minimum two units are used for point to point communication. Many units can operate simultanuously.

A wide temperature range and IP65 protection means it will fit most outdoor and indoor environments.

Please call or mail Norsk Display for detailed specifications.
